THE MEXICAN WAR.

NEW ORLEANS, May 24, 1846.

For the first time for many days the city seems to be

a little quiet, and one can realize that it is Sunday.

The drums have apparently dropped their sticks from

exhaustion, and the fliers completely blown them-

selves out. This is not to be wondered at when you con-

sider that for three or four weeks the whole city has been

in the most complete and terrible excitement night and

day. Four regiments have arrived on the ground

which is the scene of their future triumphs, and

yesterday four other companies left. There are now or

ganizing four other regiments, two of which are nearly

completed, and companies of good fighters are coming in

from the country every day. We have had no news

from the Rio Grande for two days, and are very im-

patient.

Similar to say, Maj. Gen. Gaines has received no spe-

cific directions from the War Department, and is com-

pelled to act solely on his own responsibility. He has

confessed that he has acted with a promptness and

decision that is deserving of the warmest praise. The im-

pression of the public mind is that the fighting is all

over, and that the Mexican army will retreat to the

advancing forces till she reaches the almost impen-

sable mountains which comparatively small force will

be able to overcome. It is probable, however, that the

measures are determined upon, the war will be a

long and tedious one—every man and boy capable of

bearing arms in Mexico will be compelled to do so, and

there will be no relief to the country. The fact is

that the Mexican army will retreat to the

advancing forces till she reaches the almost impen-

sable mountains which comparatively small force will

be able to overcome. It is probable, however, that the

measures are determined upon, the war will be a

long and tedious one—every man and boy capable of

bearing arms in Mexico will be compelled to do so, and

there will be no relief to the country. The fact is

INCIDENTS, &c., OF THE WAR.

NEW ORLEANS, May 24, 1846.

A regimental muster in Berkeley county, Va., a few

days ago, the assembled multitude, was addressed by

Charles James Faulkner, Esq., in behalf of an effort to

raise a company of Volunteer Riflemen for the Texas

service. The Martinsburg Republican, Mr. F., took

a brief review of the cause of the war now existing

between this country and Mexico—making a strong appeal

to the patriotism of the young men of the country. In

conclusion, he remarked that he would oblige him to

give to every Berkeley Volunteer, who would serve

twelve months, and receive an honorable discharge, 100

dollars. The assembly was very much interested in

his remarks, and it was believed the company would

be organized in a few days. Mr. Faulkner, who is a

staring Whig, and a champion of the cause, is a large

landholder in Berkeley county. He is a native of

the State of Maryland, and is a distinguished citizen in the days of the revolution.

The late Major Ringgold, who was killed at the

battle of Palo Alto, was the eldest son of the late General Samuel

Ringgold, of Washington county, Maryland. His mother

was a daughter of General John Bull, who was killed at

the battle of the Clouds. Major Ringgold was a

distinguished citizen in the days of the revolution.

He entered the army, as Lieutenant of Artillery, in

July, 1818, having graduated, at West Point, with much

honor, being one of the five whose names were recorded

as the most distinguished of the class. He was at

the battle of the Clouds, and was killed at the battle of

Palo Alto. He was a distinguished citizen in the days of the revolution.
